

MSDS Collection™

KNOWLEDGE SOLUTIONS powered by **MICROMEDEX®**

- 4+ million MSDSs at your fingertips with unlimited search, download and print capability
- Easy to use – no special training is required
- Searchable within the RightAnswer integrated interface with free-text searching
- Around-the-clock, on-demand MSDS access
- Low cost of ownership – no software to download, install or maintain
- Current and continuously updated with thousands of new data sheets or updates each week

Material Safety Data Sheets (MSDSs) are an important component of product stewardship and workplace safety. They provide workers and emergency personnel with procedures for handling or working with substances in a safe manner and include information such as physical data (melting point, boiling point, flashpoint, etc.), toxicity, health effects, first aid, reactivity, storage, disposal, protective equipment, and spill-handling procedures.

MSDSs are widely used for cataloging information on chemicals, chemical compounds, and chemical mixtures. MSDS information may include instructions for the safe use and potential hazards associated with a particular material or product. These data sheets need to be available anywhere that chemicals are being used.

It's also important for organizations to be aware that the cost of non-compliance is not limited to just fines and penalties. Failure to comply with various Environmental, Health, and Safety (EHS) regulations can lead to increased days away from work for employees, higher workers' compensation claims, operational slowdowns or shutdowns, potential legal and litigation fees, as well as a negative impact on the organization's image.

RightAnswer's MSDS Collection helps organizations move beyond inefficient and labor intensive systems. It provides innovative on-demand access to millions of manufacturer's MSDSs and MSDS management products and services that assist organizations of all sizes to reduce the potential risks and liability associated with workplace exposures, injuries and illnesses.

Global agencies including the UN, OSHA, EPA, EU and Health Canada require that all potentially hazardous chemicals carry an MSDS to ensure the safety of personnel involved in manufacturing, distributing, transporting and using these materials. RightAnswer provides an industry-leading collection of MSDS documents and tools to help you meet these requirements.

MSDS Access™

With MSDS Access™, you will have 24/7 on-demand access to the MSDSonline® industry-leading database of over 4 million manufacturer-original documents. You'll quickly find the MSDSs you need within the same easy-to-use RightAnswer integrated interface.

Fisher Scientific MSDS

This MSDS database is internationally recognized for neat chemicals presented in the 16-section ANSI standard format. MSDSs are searchable within the RightAnswer interface by individual components and by chemical name, CAS number, and EINECS.

MSDS Management

To save time and help eliminate the risks of non-compliance, some organizations need additional support with on-going MSDS management. RightAnswer can help by replacing inefficient or labor intensive paper-based systems with innovative, on-demand tools. Our options can help organizations of all sizes with MSDS management and compliance, injury and illness recordkeeping, workplace safety and training, and EHS regulatory compliance.

ABOUT US

To be competitive in today's world, you need to be able to work quickly and efficiently. Whether you're looking for a Knowledge Solution or a Document Solution, RightAnswer helps you get it Right. Now.

RightAnswer Knowledge Solutions offer current and accurate chemical, MSDS, reproductive risk and regulatory compliance information, all in one place, using integrated and simultaneous search capabilities. That means you can quickly and easily find the information you need from a broad array of trustworthy dataset sources.

RightAnswer Document Solutions apply lean manufacturing methodologies and process quality principles to label and MSDS document development and management. That means you spend less time and money meeting EHS, shipping and regulatory requirements.
